

March 29, 2019

Dear Neighbor,

Thank you for coming to our March 13 town meeting at Embers 1871.

As we shared that night, we want to ensure that everyone in the community has access to clean drinking water as well as the information you need to be kept up to date on developments.

In this regard, we have posted on our website (marinette.tycofpp.com) the slide presentation we made that evening. We will provide you with regular updates, both through our website and direct communications to ensure you have the information you need.

If you have friends or neighbors who would like to hear from us, please send their names, and home or email address to jimcox@tycoint.com and we will add them to our mailing list.

As we hope we demonstrated in the meeting, we are working to remedy the water issues facing the community. And we will continue to work with local officials and residents as we continue our testing and remedial work.

Thank you for your attention.

Sincerely,

Jim Cox

Sr. Manager, Marketing Communications
