

## Ask the Senior Engineer: Office Hours Starting for Updates on PFAS Remediation Projects

Tyco recently began construction on our **Groundwater Extraction & Treatment System (GETS)**. Our contractor is also **removing soil containing PFAS** stored at the Fire Technology Center (FTC).

### → **New Public Engagement Opportunity**

To share details concerning these actions to remove the PFAS from historic activities at the FTC, Tyco will be hosting bi-weekly Office Hours with the GETS Project Senior Engineer from Geosyntec – Kirk Craig. This regularly scheduled Zoom call from **noon to 12:30 pm every other Wednesday** will provide community members the opportunity to ask questions and get additional details about the construction process.

### → **Format**

Kirk Craig will start each call by providing updates on what happened over the past two weeks and then discuss what is coming up in the next two weeks. He will then take any questions from the participants on the call. The number of participants will be limited to no more than 10 to ensure everyone can be heard.

### → **Contact**

We look forward to providing this ongoing opportunity for real-time questions and input from the community. You can submit questions ahead of time via the Contact Us tab on the [tycomarinette.com](http://tycomarinette.com) website or by calling 715-582-7100.

## JOIN US FOR OUR MEETING

Wednesday, September 8 • 12:00pm CT

Visit [Zoom.us](https://zoom.us) with the info below:

Meeting ID: **836 9006 1173**  
or Dial in: **+1 (312) 626-6799**

If you cannot virtually attend these meetings, as always, you can send an e-mail via the [tycomarinette.com](http://tycomarinette.com) website or call **715-582-7100** with any questions or input.

**We look forward to sharing our work and hearing your feedback!**
